

Posterior Predictive Check  
Model-predicted lines should resemble observed data line

Linearity  
Reference line should be flat and horizontal

Homogeneity of Variance  
Reference line should be flat and horizontal

Influential Observations  
Points should be inside the contour lines

Collinearity  
High collinearity (VIF) may inflate parameter uncertainty

Normality of Residuals  
Dots should fall along the line

Normality of Random Effects (Site)  
Dots should be plotted along the line
